PROFESSIONAL SUMMARY

Computer Science engineer (B.Tech, 76%) with hands-on experience building machine learning, NLP-powered systems, and business intelligence dashboards. Developed an AI-driven career recommendation engine using Python, Scikit-learn, and NLTK, and an interactive Sales Performance Dashboard using Power BI and DAX. Proficient in Python, SQL, Pandas, NumPy, Scikit-learn, Power BI, and Machine Learning, with full-stack development experience enabling end-to-end data pipeline and application delivery. Trained in Data Science and Generative AI. Seeking an entry-level Data Scientist or Data Analyst role to apply statistical modelling, predictive analytics, and data visualisation skills to solve real-world business problems.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL, Java, JavaScript, HTML, CSS

Data Science & Machine Learning: Machine Learning, Natural Language Processing (NLP), Recommendation Systems, Predictive Modelling, Exploratory Data Analysis (EDA), Feature Engineering, Model Evaluation, Cross-validation, Statistical Analysis, Skill Gap Analysis

Python Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK

Business Intelligence & Visualisation: Power BI, DAX, Data Visualisation, Interactive Dashboards, Sales Analytics, Microsoft Excel

Development & BI Tools: Jupyter Notebook, MySQL, Git, Visual Studio Code, Spring Boot, MVC Architecture

Soft Skills: Leadership, Communication, Time Management, Analytical Thinking, Problem Solving

INTERNSHIPS

Full Stack Java Development Intern | DataValley

May 2025 – Jul 2025

- Developed and deployed web applications using Java, HTML, CSS, JavaScript, and MySQL, demonstrating end-to-end software delivery capability applicable to data pipeline development.
- Engineered RESTful backend APIs with full CRUD functionality, supporting structured data extraction and storage workflows.
- Applied MVC architecture and Git version control across collaborative development workflows, ensuring code quality and maintainability.

Full Stack Development Intern | Rashtriya Ispat Nigam Ltd (RINL), Visakhapatnam

May 2024 – Jul 2024

- Architected and delivered a production-grade full-stack Java application across a 3-month intensive program at India's premier government steel enterprise.
- Coordinated backend logic, frontend integration, and deployment pipelines to ensure seamless end-to-end delivery — transferable to building and shipping ML model pipelines.
- Optimised application performance and maintained scalability across all system layers, demonstrating engineering rigour applicable to data-intensive environments.

PROJECTS

Sales Performance Dashboard — Power BI | DAX | Data Visualisation | Business Intelligence

GitHub: github.com/Karamthot-anil-naik/PowerBI-Sales-Dashboard

- Designed and built an interactive Sales Performance Dashboard using Power BI and DAX, analysing business sales data across multiple regions (East, West, North, South) and product categories.
- Implemented DAX measures to calculate key business KPIs including Total Sales (360K), Total Profit (72K), and profit margin — enabling data-driven business decision making.
- Built dynamic visualisations including Sales Trend (time-series line chart), Regional Sales Analysis (bar chart), and Category Sales Distribution (pie chart) with interactive region-level filters.
- Delivered a fully interactive dashboard with drill-down capability and cross-filtering, simulating a real-world business intelligence reporting environment.

Autonomous Career Intelligence Agent (ACIA) — Python | Machine Learning | NLP | Scikit-learn | Pandas

- Built an end-to-end AI-powered career recommendation system using Machine Learning and NLP (NLTK, TF-IDF, cosine similarity) to deliver personalised, data-driven career guidance across 50+ job roles.
- Engineered a Scikit-learn recommendation engine with feature engineering and model evaluation (cross-validation) that maps user skill profiles to high-demand job roles with measurable accuracy.
- Conducted automated skill-gap analysis using Pandas and NumPy to identify missing competencies and generate targeted upskilling recommendations — demonstrating full DS workflow from EDA to insight delivery.
- Visualised career mapping outputs and skill distribution using Matplotlib and Seaborn to support interpretable, stakeholder-ready reporting.

EDUCATION

B.Tech — Computer Science and Engineering | Krishna University College of Engineering and Technology
Sep 2022 – Present

Percentage: 76% | Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Statistics, Probability, Linear Algebra, Machine Learning

MPC (Mathematics, Physics, Chemistry) | APSWREIS (JR) College, Atchempet *May 2020 – May 2022*
Percentage: 83%

CERTIFICATIONS

- Internship Completion — Full Stack Development with Java | DataValley
- Training Completion — IT & ERP with Java | RINL (Steel Authority of India)
- Pursuing: Machine Learning Specialization — Coursera (Andrew Ng) | In Progress
